

Mockup Notes

Overall, I really like what you've done! I love the picture at the top and the information is 'informational' and not opinionated which is great. I like how the colors of the navigation bar match the photo. The spacing works well, too. Only comment I have is maybe make the font smaller and add a heading on the home page info? Also I think the background colors for the homepage below the phot don't match the initial aesthetic which is very strong. Maybe a light blue or black instead of the maroon and brown?

Overall, it looks great.
